Subject: Thank you for helping us drive cancer care forward
Attachments: Hope for Tomorrow Impact Report 2021-22.pdf

Dear Sarah and all at Halstead Town Council,

I hope you are well.

As a loyal supporter of Hope for Tomorrow, I thought you would be interested in reading our latest Impact Report. Please find attached.

Despite many challenges that COVID-19 brought, both to Hope for Tomorrow and our NHS Trust Partners, a record number of treatments were delivered on board one of our mobile cancer care units. And already in 2022/23, we are seeing NHS Trust Partners extending the mobile cancer care service in their local area, thereby helping more cancer patients gain access to their treatment closer to them.

We do not receive any funding, so rely on the kindness and support from people like you, to enable us to make life easier for people living with cancer. For this, we are ever so grateful.

On behalf of everyone at Hope for Tomorrow and the thousands of patients who benefit from our service – thank you. In the words of Fiona, who is currently receiving treatment on her local unit, which turned her treatment from 4 hours in the hospital to 30 minutes on the unit told us, “To have that facility where we can choose if we want to use it or not is amazing. It’s just gentler – for something that is so harrowing, this makes it a lot gentler. It’s just an amazing facility. We’re so lucky to have it. So lucky.”

Please do let me know if you have any questions, and I’d be happy to help. Thank you so much.

Take care and very best wishes,

Kara
