This building comes with a floor and is required to be installed on a base. It is also important the building is constructed on a solid and level foundation. Find out more >

★ **REVIEWS**

[16,197 Trusted Customer Reviews](#)

The Loxley 6' x 10' Double Door Overlap Apex Shed provides great and attractive storage space that is easily accessible due to its wide double doors and generous eaves height. This makes the overlap shed perfect for storing large garden equipment, lawnmowers or even garden furniture. The shed is constructed from overlapping boards over 34mm framing, with both the floor and roof constructed from solid sheet OSB, and the roof is covered in mineral felt to protect the building against elements. The opening joinery made window allows light in the shed and provides ventilation. The double doors are fitted with hasp and staple catch (please note that padlock is not supplied). This shed comes dip treated in honey brown finish.

i Made from timber that has been pre-treated with a water based timber treatment for protection during transit. In order to activate any stated guarantee, it is necessary that you treat the garden building with a high quality, spirit-based, timber preservative prior to or shortly after construction. This will protect the timber from weathering and will need to be repeated accordingly in relation to manufacturer's instructions.
