Agenda Item	7i

To consider replacing lights in Chapel Street carpark

When installing the CCTV cameras in Chapel Street carpark, the contractors noticed that the lights in the carpark, which are the responsibility of HTC, were not working. These are important for the security of the carpark at night, and for the prevention of night time flytipping. and they have been out of order for some time, as previously electricians have said that they are unable to do the job. The new lights suggested are LED and would take far less power than previously. The cost of the lights is increased by the need to comply with light pollution rules when installing new lights.

Quote 1 : £3342 + VAT

Quote 2 £1380.87 + VAT

Quote 3 £2800 + VAT

This can be covered by the Car parks major maintenance earmarked reserves which currently stand at £7681.

Recommendation: that HTC agrees to the installation of working lights in Chapel Street carpark, as described in background information, using quote 2.
