To consider buying a new sprayer for Courtaulds

We have a sprayer at Courtaulds used for spraying fertiliser and similar products onto the various pitches. Because of the products used, the metal on the sprayer eventually corrodes. In addition the engine on our current sprayer is no longer easy to start. The sprayer generally needs replacing every 6 or 7 years. The asset list shows that the last one was bought in 2012!

A replacement will cost £1016 + VAT. This should be taken from capital reserves.

Recommendation : that HTC buys a new sprayer for Courtaulds.

Sarah Greatorex **Town Clerk**
