Agenda Item	5

Traffic management for torchlight procession

Following the meeting with the SAG at BDC, several traffic management companies have been approached to provide traffic management for the torchlight procession. Advice has also been sought from HTC's insurance company on public liability covering the use of tractors as mitigating vehicles. They are covered when stationary. The tractors are not there to create road closures. The road closures will be managed by the Traffic management company.

So far only 1 of the requested quotes has been received, although two others were promised. One of the companies has now said that we are too far away. It is hoped that that at least one further quote will be received during the present week.

Quotes for traffic management

Quote 1 : £1665 + VAT

Quote 2:

Recommendation: that HTC selects quote 1. This is a reasonable quote and was produced promptly on request.
