To consider buying a new watering machine

HTC groundsmen have for many years been using a watering machine kindly built and donated by Halstead in Bloom, to water the HiB displays which are not accessible by tractor. It is stored in a cage behind the RBL building on the Causeway and used to water the Causeway displays in particular. It is no longer in a good condition, and the groundsmen have requested its replacement with the sprayer below, which could also be stored at the RBL.

Aquaspray® Pro 60L Battery-Operated Water Spray Tank

[Equip2clean](#) | SKU: AquasprayPro60L

Sale price£895.00 Regular price£1,195.00

Aquaspray® Pro 60L Battery-Operated Water Spray Tank

Description

Aquaspray® Pro 60L Battery-Operated Water Spray Tank — Max Capacity, Minimal Hassle

Our largest mobile pure-water tank. Fill, connect to your water-fed pole, and clean—simple. The Pro 60L is built for demanding sites: shopping centres, hotels, schools, hospitals and pro window cleaning teams. Comes on a commercial trolley with **100 m hose & reel** and variable-pressure pump for perfect flow control.

Key Features

- **Commercial Trolley** — 4 pneumatic tyres (front brakes) for smooth mobility.
- **100 m Hose & Reel** — reach deep into sites without moving the trolley.
- **Plug & Clean** — connects to Aquaspray® 20/25/28/30/40ft poles or standard water-fed poles.
- **Variable Pressure Pump** — dial in your ideal flow; brass on/off valve at the handle.
- **Wide Fill Collar + Filter** — easy top-up; two-stage filtration reduces blockages.
- **60 L Tank with Bottom Drain** — quick emptying & rinse after jobs.
- **Rechargeable System** — 12V battery & 240V charger pack included.

In the Box

- Aquaspray® Pro 60 unit (trolley + 60L tank)
- 12V 9Ah maintenance-free rechargeable battery
- 240V battery charger pack
- 100 m water hose & reel with female Hozelock connector
- Spray handle & lance + set of spray nozzles

Technical Specifications

Spec	Details
Model	Aquaspray® Pro 60
Water Tank Capacity	60 Litres
Working Pressure	Variable 0.20–1.00 MPa (29–100 PSI)
Flow Rate	4.5 L/min
Dimensions	89 × 47 × 84.5 cm
Weight (incl. battery)	47.5 kg

Setup Note

The fuse must be installed (included in the packaging) for the unit to power on.

This model has been highly recommended by our supplier and will be offered at a discount.

Recommendation : that HTC buys the new sprayer for watering using funds from the budget for environment maintenance.
